

----- cutting edge

file formats: PDF, EPS, TIF, PSD
colour space: CMYK, greyscale, Pantone
resolution: min. 250 dpi
colour appl.: max. 320%
bleed area: 3 mm circumferential

**Attention: Specification not in original size.
Please use template.**

(Printed matter is always created approximately 3 mm larger than it will later be in the final format to avoid white flashes, i.e. white "crescents" on the outer edge.
Therefore, place the labels with a diameter of 252 mm, although the final format 246 mm. Make sure that in the edge area and at the center hole
(Final size 7.5) e.g. no text can be cut away!)
